5. B2B Marketing Ideas

Goal: win restaurants, cafes, shops and offices with bulk deals on 11.11.

Idea	How it works	Cost (PKR)

Email and LinkedIn outreach	Direct mail to hotels, caterers and offices (uses the digital tools)	Included
B2B total		**160,000**

6. Pros and Cons of 3 Strategies

Strategy	Pros	Cons
Influencer marketing	Trusted voices, targeted by city and interest, easy to measure through views and codes, flexible budget	Results depend on the creator, fake followers are a risk, content needs approval time
Billboards and signage	Constant visibility, builds brand recall, reaches people who are not online	Highest fixed cost, hard to track sales, location and permit limits
Paid social and digital	Precise targeting, starts from small daily budgets, live reporting, can be paused or improved any day	Ad fatigue if creative repeats, depends on platform rules, needs daily monitoring

Recommendation: keep digital as the core (best cost per result), use influencers to add trust, and keep billboards limited to the store front and two key roads.

7. Pop-Up Stalls and Customer Engagement

Plan: 3 stalls (one at the store entrance, one at a nearby market or park, one at a nearby campus) for 3 days, 8 to 10 Nov.

Activities:

- **Spin and win:** spin the wheel to win 11% off vouchers and gift items.
- **Taste corner:** mini samples of dairy, bakery and snacks.
- **Photo booth:** 11.11 photo frame, share on Instagram and tag the store for a draw entry.
- **Guess the basket:** guess the basket total and win it.
- **QR sign-up:** scan to join the loyalty card and WhatsApp deals.

Cost per stall per day	Cost (PKR)
Booth, branding and table	15,000
3 staff for the day (3 x 2,000)	6,000
Space and permission	7,000
Prizes and samples	12,000
One stall, one day	**40,000**

3 stalls x 3 days = 9 stall-days x PKR 40,000 = PKR 360,000.
